

# Electric Single-Girder Suspension Crane

This light-duty crane is designed for operation on a track system. It is used for lifting and moving materials in workshops and warehouses.

## Product Overview

### Efficient Material Handling

The LX model electric single-girder suspension crane is a versatile, light-duty lifting solution designed for efficient material handling. It features a robust single-girder design that suspends from ceiling or roof structures, making it an ideal choice for workshops and warehouses where floor space is at a premium. The system integrates a trolley and electric hoist to ensure precise load positioning.

## Technical Configuration

### System Components

- Single girder
- Electric hoist
- Trolley

Crane Category	Light-duty suspension crane
Control Options	Pendant control, Remote control

## Operational Environment

Recommended Use Cases	Workshops, Warehouses, Material handling facilities
