

Electric Slotting Machine for Stone and Concrete

This electric slotting machine is designed for creating slots in stone, concrete, and masonry. It features a high-performance motor, diamond blade, adjustable cutting depth, and water cooling system.

Product Overview

High-Efficiency Electric Slotter

This electric slotting machine is a high-performance tool engineered for precise grooving in stone, concrete, and masonry surfaces. Equipped with a robust 1800W motor, it delivers consistent power for demanding construction and renovation tasks. With adjustable depth and width settings, it provides the versatility required for professional-grade electrical or plumbing installations.

Performance Metrics

Rated Input Power

1800 W

Rated Input Power

5000 r/min

No-Load Speed

Grooving Capacity

Parameter	Value
Max Grooving Depth	60mm
Grooving Width	10-50mm

Technical Specifications

Electrical Requirements

- Voltage: 110/220V
- Frequency: 50/60Hz

Compatible Materials

Stone, Concrete, Masonry

Logistics and Handling

Shipping Information

- Net Weight: 7.8kg
- Pieces per Carton: 2
- Measurement: 44 x 41.5 x 44.5cm
