

Electric Snow Sweeper for Walkways and Driveways

This snow sweeper is designed for efficient snow removal from walkways, driveways, and patios. It features a durable construction with a powerful motor for effective clearing.

Product Overview

High-Efficiency Electric Snow Sweeper

This powerful electric snow sweeper is engineered for efficient snow removal on walkways, driveways, and patios. Equipped with a brushless motor, it offers a sustainable and convenient alternative to gas-powered tools for residential and light-to-moderate snow conditions. The design features a foldable handle with a comfortable sponge grip and an integrated LED lighting system for safe operation in low-visibility environments.

Performance Metrics

Performance Highlights

1000 W Rated Power	508 mm Sweeping Width	300 mm Max Snow Depth	4.56 m Throwing Distance
