Overview

Efficient Kitchen Solution

This versatile electric soup maker streamlines meal preparation by combining heating and blending into one seamless process. Capable of producing fresh hot soups, smoothies, and sauces in just 20 to 30 minutes, it is designed for both professional kitchens and high-end culinary environments. With an intelligent control system and high-quality stainless steel components, it offers both speed and reliability for daily use.

Technical Specifications

Motor Power	300 W
Heating Element Power	1000 W
Liquid Capacity	1.6 L
Operating Voltage	220-240V
Construction Material	SUS304 Stainless Steel, Pure Copper Motor

Features & Programs

Available Programs

- Smooth Soup
- Chunky Soup
- Juice
- Blend/Clean

Safety Systems

Dry Burning Protection • Overfill Sensor • Overspill Sensor • Embedded Protected Socket
