Product Overview

Versatile Kitchen Automation

This high-performance electric soup maker is designed to simplify meal preparation by combining heating and blending into one seamless process. With a 1000W heating element and a robust 300W motor, it can transform fresh ingredients into hot soups, sauces, or healthy juices in just 20 to 30 minutes. Its compact, stainless steel design and intelligent safety features make it an ideal, space-saving solution for commercial and professional environments.
