

Electric Soy Milk and Soup Maker

This electric appliance features a patented sealed cooking design. Its 950W power allows it to cook in 35 minutes and the large 1.3-1.5L capacity jar serves 4-5 portions.

Product Overview

Professional Grade Soy Milk & Soup Maker

This innovative appliance utilizes patent-pending micro-pressure technology to replicate traditional sealed cooking methods, ensuring optimal heat retention for perfect extraction. Its double-wall design provides superior thermal insulation, allowing for a cool-touch exterior while maintaining high internal temperatures for rapid boiling. It is an ideal solution for preparing high-quality soymilk, porridge, and soups with consistent results in a professional or domestic kitchen environment.

Technical Specifications

Construction	Double-Wall Thermal Insulation
Cooking Technology	Micro-pressure sealing technology

Safety & Features

Applications

- Soymilk preparation
- Porridge cooking
- Soup preparation

Safety Protections	Overheat Protection, Automatic Shut-off, Cool-Touch Exterior
