

Electric Square Pan with Glass Lid

This electric square pan measures 300mm×300mm×75mm and has a power of 1500W. It features a non-stick coating and includes a tempered glass lid for easy monitoring, as well as insulated handles for safe handling.

Product Overview

Versatile Electric Square Pan

This electric square pan is designed for efficient and consistent cooking, featuring a non-stick surface that simplifies both food preparation and cleanup. The square design maximizes available cooking space, making it an excellent choice for frying, sautéing, simmering, and braising. Equipped with a tempered glass lid and insulated handles, it ensures both convenience and safety during operation.

Design & Construction

Shape	Square
Lid Material	Tempered Glass
Key Features	Non-stick Coating, Insulated Handles, Even Heat Distribution
