

Electric Steam Cleaner with Vacuum

This electric steam cleaner combines steam cleaning and vacuuming into one unit. It features adjustable steam and water settings and a stainless steel construction.

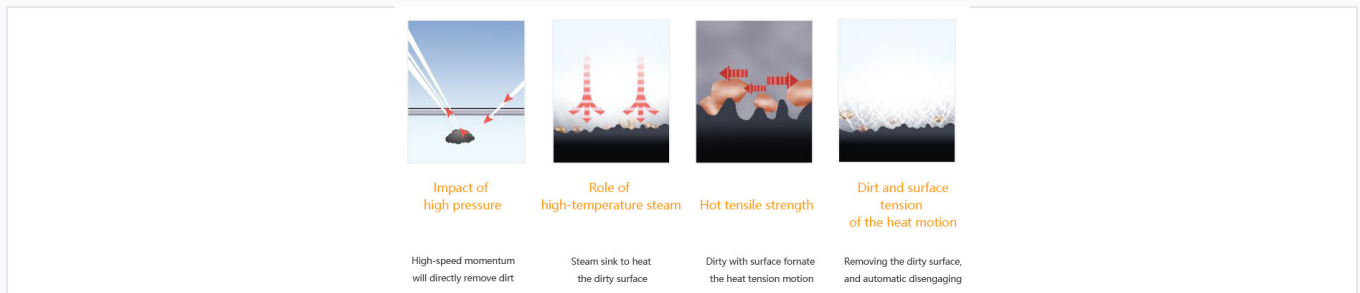

Overview

Versatile Steam & Vacuum Cleaning Solution

This professional-grade electric steam cleaner integrates high-temperature steam technology with powerful wet and dry vacuuming capabilities. Designed for industrial and commercial environments, it effectively removes stubborn grime and debris from a wide variety of surfaces. With a rapid 30-second preheating time and comprehensive control monitoring, it offers an efficient, reliable solution for deep cleaning tasks ranging from automotive interiors and engines to upholstery and facility maintenance.

Technical Specifications

The cleaning process utilizes high-pressure, high-temperature steam to effectively remove dirt and surface tension.

Model Specifications

Model	Steam Consumption (L/H)	Working Pressure (bar)	Tank Capacity (L)
CW-ES03V	10	5-10	10
CW-ES04V	14	6-10	10
CW-ES06V	20	5-13	15
CW-ES08V	30	10-13	15

Performance Metrics

165 °C

Max Steam Temperature

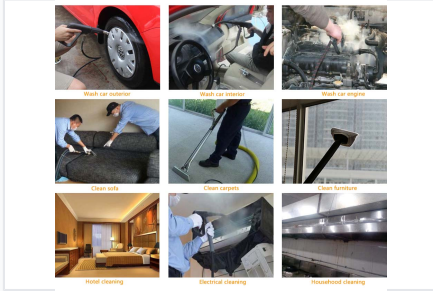

30 seconds

Preheating Time

220 V

Voltage

Features & Applications

Versatile cleaning capabilities suitable for automotive, hospitality, and household environments.

The machine comes equipped with a comprehensive set of standard accessories for immediate use.

Intuitive control panel featuring comprehensive monitoring for pressure, temperature, and water levels.

Standard Accessories

- Steam hose
- Steam/small vacuum nozzle
- Steam spray gun
- Inlet water hose
- Steam/vacuum floor nozzle

Monitoring Indicators

Steam Switch • Pump Indicator • Heating Indicator • Power Indicator • Temperature Indicator • Pressure Indicator • Water Level • Antifreeze Switch

Suitable Applications

Car Interiors, Car Exteriors, Car Engines, Upholstery, Carpets, Furniture, Hospitality, Electrical Appliances
