

Electric Steam Iron for Clothes

This steam iron efficiently removes wrinkles from various fabrics. It features adjustable temperature settings and a non-stick soleplate for smooth gliding.

Product Overview

Professional Steam Ironing Performance

The SIC-6038 electric steam iron is engineered for high-efficiency wrinkle removal across a wide variety of fabric types. Featuring an ergonomic design and advanced steam control, it ensures smooth gliding and precise heat application to protect delicate garments. Integrated safety features like automatic shut-off and a transparent water tank provide both convenience and peace of mind for professional use.

Technical Specifications

Power Consumption

1200 W

Power
