

Electric Steam Iron for Garment Care

This electric steam iron is designed for efficient and effective garment care. It features variable steam control, a non-stick soleplate for smooth gliding, and a water tank for steam generation.

Overview

Professional Garment Care Solution

This high-performance electric steam iron is engineered for versatile garment maintenance, featuring multiple steam modes including vertical steam and burst functions. Equipped with a 2200W heating element and adjustable temperature controls ranging from 60 to 240°C, it ensures precision for various fabric types. The ergonomic design incorporates a 350ml water tank and advanced safety features to provide efficient, reliable ironing for professional environments.

Technical Specifications

Steam Volume

15 g/min

Minimum Steam

20 g/min

Maximum Steam

Power Output	2200 W
Input Voltage	220-240V
Water Tank Capacity	350 ML
Soleplate Size	23.0 x 12.0 CM
Cable Length	1.5 M

Features & Materials

Materials Used

- PBT heat insulation board
- PP water tank
- ABS+PC main body

Additional Functions

Anti-Calc • Anti-Drip • Auto Shut-off • Self-Cleaning • Vertical Steam

Soleplate Types	Non-stick coating, Stainless steel, Ceramic coating
