

Electric Steam Iron for Garment Care

This electric steam iron is designed for efficient ironing. It features adjustable temperature control and a steam function, with a transparent water tank for monitoring water levels.

Overview

Efficient Garment Care Solution

This modern electric steam iron is designed for effective and convenient garment care in both household and light commercial settings. Featuring a sleek white and blue aesthetic, the unit includes a transparent water tank that allows users to easily monitor water levels during operation. With adjustable temperature controls and a powerful steam function, it ensures smooth, wrinkle-free results for various fabric types.
