

Electric Step-Through Scooter Bicycle with Basket and Backrest

This electric scooter bicycle features a step-through frame and a rear seat with a backrest. It is equipped with a front basket, front and rear suspension, and a battery pack, with pedals for optional manual operation.

Overview

Versatile Urban Mobility Solution

This electric step-through scooter bicycle is designed for convenient and comfortable urban transportation. It seamlessly blends the ease of a scooter with the utility of a bicycle, featuring a low-step frame for easy boarding and a rear seat with a backrest for passenger comfort. Equipped with both a battery-powered motor and functional pedals, it offers flexible operation modes suitable for various commuting needs.
