

Electric Step-Through Scooter for Urban Commuting

This electric scooter is designed for urban commuting. It features front disc brakes, telescopic front suspension, a digital display, and integrated lights.

Overview

Urban Commuting Solution

This electric step-through scooter is engineered for efficient urban commuting, combining a robust 1500W motor with a reliable lead-acid battery system. Its step-through frame design ensures easy mounting and dismounting, making it an ideal choice for daily city travel. Equipped with safety features like dual disc brakes and comprehensive lighting, this scooter offers a practical and eco-friendly transportation alternative.
