

Electric Step-Through Scooter Moped

This electric scooter moped is designed for urban transportation. It features a step-through frame, comfortable seat, rear storage, and reliable braking.

Overview

Urban Mobility Solution

This electric step-through scooter moped is engineered for efficient urban transportation. Its ergonomic step-through frame design ensures effortless mounting and dismounting, while the integrated rear storage box provides practical utility for daily commuting. Powered by a quiet, emission-free electric motor, it offers a sustainable and reliable alternative for city travel.
