

Electric Stone Grinder and Polisher

This electric stone grinder and polisher is designed for surface preparation and finishing. It features a robust motor, adjustable handle, and integrated water feed system for wet grinding applications.

Product Overview

Professional Surface Preparation

This electric stone grinder and polisher is engineered for high-performance surface preparation and finishing on a variety of hard materials. Featuring a robust motor and an integrated water feed system, it is specifically designed for wet grinding applications to ensure optimal dust suppression and cooling. The adjustable handle enhances ergonomics, making it an ideal choice for professionals working with granite, marble, and concrete surfaces.

Technical Specifications

Key Features

- Integrated water feed system
- Adjustable handle for ergonomic operation
- Robust motor designed for heavy-duty use
- Optimized for wet grinding applications

Application Category

Surface Preparation • Finishing • Wet Grinding

Compatible Materials

Granite, Marble, Concrete, Natural Stone
