Product Overview

Reliable Hot Water Solution

This electric storage water heater is engineered for efficiency and durability in both residential and commercial settings. Featuring an electrostatic dry powder enamel coating on the inner tank and a thicker magnesium anode, it is built to resist corrosion and ensure a long service life. With comprehensive safety protections including overheat and anti-over-pressure systems, this unit provides a dependable and secure hot water supply.

Technical Specifications

Available Capacities

- 30L
- 50L
- 80L
- 100L

Insulation

Overall PUF

Safety & Durability

Safety Features

Overheat Protection, Anti Over-pressure Protection

Tank Construction

Electrostatic dry powder enamel coating

Anode Type

Thicker Magnesium Anode

Certifications
