Product Overview

High-Efficiency Residential Water Heating

This electric storage water heater offers a versatile heating solution for residential applications with adjustable temperature control up to 75°C. Designed for durability and safety, the unit incorporates an anti-scale, self-cleaning heating element and a robust blue diamond inner tank with a single weld line design to minimize leakage risk. Its compact, wall-mountable cylindrical form factor ensures a seamless integration into diverse home environments.

Technical Specifications

Rated Power Options

- 500W
- 1000W
- 1500W
- 2000W
- 2500W

Water Proof Degree

IPX4

Rated Voltage

220-240V, 110-120V

Rated Pressure

0.8 MPa

Control & Operation

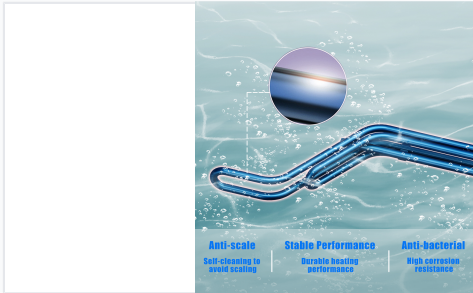

Control Features

- Knob control panel
- Adjustable thermostat
- Integrated temperature meter
- Heating pilot lamp

Temperature Range

Ambient to 75°C

Engineering Quality

Advanced self-cleaning heating element designed for longevity and superior water quality.

Comparison of single vs. triple weld lines showing a 67% reduction in leakage risk.

Inner Tank Technology

Blue Diamond single weld line design for high-pressure durability and reduced leakage risk

Heating Element Properties

Anti-scale, Self-cleaning, Anti-bacterial, Corrosion resistant
