

Electric Submersible Sewage Pump

This electric submersible sewage pump is designed for efficient wastewater management in civil engineering and building sites. It is suitable for handling rainwater, mud water, and fluids with high abrasive content.

Product Overview

Professional Sewage Management Solution

This electric submersible sewage pump is engineered for demanding fluid handling in civil engineering, building sites, and utility applications. It excels at managing rainwater, mud, and abrasive fluids, ensuring reliable drainage even in challenging environments. With a robust design and high-efficiency performance, it provides a consistent solution for diverse wastewater management requirements.

Certifications

| | |
|-------------------|-----------------------------|
| Quality Standards | CE, GS, RoHS, ISO 9001, CCC |
|-------------------|-----------------------------|

Operating Conditions

| | |
|-----------------------|------------|
| Max Water Temperature | 40 |
| PH Operating Range | 6.5 to 8.5 |
| Max Immersion Depth | 10 M |

Electrical Specifications

| | |
|--------------------|--|
| Insulation Class | Class F |
| Ingress Protection | IP68 |
| Power Supply | Three phase, 220V \pm 10%, 50Hz/60Hz |

Applications

Suitable Applications

- Civil engineering
- Building sites
- Basements
- Utility pots
- Rainwater drainage
- Mud water handling
- Abrasive fluid transfer
