

Electric Submersible Water Pump

This submersible pump offers high efficiency and a long operational life. It is designed for efficient water removal in various applications.

Overview

High-Performance Dewatering Solution

The YPM-3"/6M electric submersible water pump is engineered for heavy-duty water removal across demanding environments. Featuring a robust electric motor encased in a durable, protective housing, this unit is designed for long-term reliability and efficient operation. It is an ideal solution for construction sites, flooded basements, and general utility dewatering tasks.

Technical Specifications

Pump Discharge Size	3 inches
Model Number	YPM-3"/6M

Construction & Design

Key Design Features

- Integrated protective frame base
- High-performance metal pump head
- Flexible discharge hose included
- Heavy-duty electric motor

Housing Construction	Durable Metal Casing, Protective Frame, Corrugated Reinforced Hose Section
----------------------	--

Applications

Recommended Applications

Construction Sites • Basement Dewatering • Emergency Flood Removal • Industrial Utility
