

Electric Surface Polisher with Dual Handles

This electric power tool is equipped with dual handles for stable operation. It is designed for polishing and buffing surfaces to a smooth finish.

Overview

Professional Surface Polishing Solution

This electric surface polisher is engineered for high-performance buffing and polishing tasks. Featuring a robust dual-handle design, it provides operators with enhanced control and stability during extended use. The unit includes a specialized multi-layered polishing pad system, combining white and black foam layers to ensure a consistent, high-quality finish on various surfaces.

Technical Specifications

Polishing Pad Layers

- White foam layer
- Black foam layer

Model Number	CYTS-S1P-240
Power Source	Electric (Wired)
Key Features	Dual Handles, Multi-layered Pad, Ergonomic Grip
