Overview

GT250A Electric Suspension Hoist

The GT250A is a robust and reliable electric suspension hoist engineered for efficient material handling in industrial and construction environments. Designed for safety and precision, it features a powerful 1300W motor and a high-quality braking system to ensure secure lifting operations. Its compact design and suspension mounting make it an ideal solution for confined spaces, workshops, and various lifting applications where reliability is paramount.

Performance Metrics

Rated Capacity

250 KG	15 m/min	60 M
Capacity	Lifting Speed	Lifting Height

Motor Specifications

Parameter	Value
Input Power	1300 W
Rated Voltage	230V 50Hz
Current	5.7 A

Technical Details

Wire Rope Specifications

- Diameter: 5.1 mm
- Breaking Strength: >1870 N/M2

Safety & Compliance	Insulation Grade B, Protection Grade IP54, Duty M1, Working Rate S3 40%-10min

Installation	
Beam Diameter Compatibility	40 mm
