

Electric Tile Cutter with Water Cooling System

This electric tile cutter is designed for accurately and efficiently cutting tiles. It features a water cooling system that minimizes dust and debris while keeping the blade cool.

Product Overview

Precision Tile Cutting Solution

This electric tile cutter is engineered for professional-grade accuracy and efficiency when working with ceramic, porcelain, and stone materials. Its robust stainless steel construction ensures long-term durability and resistance to corrosion in demanding environments. Equipped with an integrated water cooling system, it effectively manages dust and debris while preserving blade integrity for consistent, high-quality performance.

Technical Specifications

Compatible Materials	Ceramic, Porcelain, Stone
Cooling System	Yes
Table Material	Stainless Steel

Safety & Features

Safety Features

- Blade Guard
- Overload Protection

Operational Features

Adjustable Cutting Guide • Integrated Water Reservoir • Dust Reduction
