

Electric Tile Cutter with Water Cooling

This electric tile cutter is designed for precise and efficient cutting of ceramic, porcelain, and stone tiles. The integrated water cooling system minimizes dust and extends blade life.

Overview

Professional Tile Cutting Solution

This compact electric tile cutter is engineered for the precise and efficient cutting of ceramic, porcelain, and stone tiles. It features an integrated water cooling system designed to minimize dust output while significantly extending blade longevity. With a powerful motor and an adjustable cutting guide, this tool ensures smooth, accurate cuts for both professional installation projects and demanding DIY tasks.

Performance

Cooling System

Water Cooling

Suitable Materials

Ceramic, Porcelain, Stone

Features

Key Features

- Integrated water cooling system
- Adjustable cutting guide for accuracy
- High-performance motor
- Compact design for portability
