

Electric Tire Inflator Air Compressor

This compact electric air compressor is designed for inflating tires and other inflatable items. It features an integrated pressure gauge for accurate inflation, a convenient on/off switch, and a durable hose for easy connection.

Overview

Compact Performance for On-the-Go Inflation

This portable electric tire inflator is designed for efficient and reliable inflation in automotive and household environments. Powered by a standard 12V DC cigarette lighter connection, it offers a convenient solution for maintaining optimal tire pressure. With a durable 16mm cylinder construction and an integrated pressure gauge, this unit ensures precise control during operation.

Performance Metrics

Key Performance Metrics

250 PSI
Max Pressure

120 W
Power

10 A
Current

12 L/min
Flow Rate

Technical Specifications

Voltage	DC 12V
Cylinder Diameter	16 mm
Cable Length	3.3 m
Hose Length	45 cm
Net Weight	1.5 kg

Operational Limits

Max Continuous Runtime	10 minutes
Supported Pressure Units	Bar, PSI, kg/cm ² , kPa

Design & Features

Connection Type	Cigarette Lighter Plug
Article Number	PSAC 60
