Product Overview

High-Precision Heavy-Duty Fastening

The PTD-700L/PTD-1500L electric tire wrench is engineered specifically for large tyre fixing and disassembling operations. Featuring a precision torque control device, it ensures consistent tightening for M16-M27 high-strength bolts. This tool is designed to improve operational safety and efficiency in heavy-duty maintenance environments.

Technical Capabilities

Primary Applications

- Large tyre fixing
- Large tyre disassembling
- High-strength bolt maintenance

Key Features

Precision Torque Control • Heavy-Duty Construction • Ergonomic Design • Adjustable Torque Settings

Compatible Bolt Sizes

M16, M18, M20, M22, M24, M27
