

Electric Torque Wrench for M27 Fasteners

This electric torque wrench provides adjustable torque from 300 to 700 N.m. It is designed for tightening bolts and nuts with precision.

Product Overview

High-Performance Electric Torque Wrench

The SG-E10 electric torque wrench is engineered for precision and efficiency in heavy-duty fastening applications. Designed specifically for M27 fasteners, this tool delivers a robust 1000Nm of torque to ensure secure connections. It features a reliable 1200W motor compatible with standard 230V power supplies, making it an essential asset for industrial assembly and maintenance tasks.

Technical Specifications

Maximum Torque

1000 Nm
Max Torque

Power Consumption	1200 W
Voltage	230V
Frequency	50/60Hz
Model Number	SG-E10

Compliance & Standards

Certifications

CE
