

Electric Torque Wrench for Tire Service

This electric torque wrench is specially used in large tire fastening and removal. It delivers precise torque control, ensuring accurate and repeatable tightening.

Product Overview

Professional Electric Torque Wrench

The PTD-700L is a high-performance electric torque wrench specifically engineered for demanding tire service and industrial applications. This robust tool provides precise torque control, ensuring accurate and repeatable tightening for every operation. Designed with the professional mechanic in mind, it combines durable construction with an ergonomic build to deliver reliable and efficient performance in busy workshop environments.

Technical Specifications

Torque Range

300 N.m

Min Torque

700 N.m

Max Torque

Model Number	PTD-700L
Max Power Consumption	1100 W
Voltage	220V

Included Accessories

Included Sleeve
27T
