

# Electric Torque Wrench for Tire Service

This electric torque wrench is designed for efficient removal and fastening of large tires. It provides precise torque control for reliable operation on various vehicles and machinery.

## ADDITIONAL IMAGES

## Product Overview

### Professional Tire Service Solution

The PTD-1500L electric torque wrench is engineered specifically for high-performance tire maintenance and industrial fastening applications. Designed for reliability and precision, this tool provides a robust solution for tightening and loosening bolts on various vehicles and machinery. Its ergonomic design and high torque output ensure efficient operation, reducing user fatigue during demanding service tasks.

## Technical Specifications

### Torque Range

**600 N.m**

Min Torque

**1500 N.m**

Max Torque

### Included Components

- Standard sleeve (32T)

Model Number	PTD-1500L
--------------	-----------

Max Power Consumption	1100 W
-----------------------	--------

Operating Voltage	220V
-------------------	------

## Application

Primary Applications	Tire Service, Automotive Repair, Fleet Maintenance, Industrial Fastening
----------------------	--
