

Electric Tow Tractor

This electric tow tractor is designed for various industrial and commercial applications. With a towing capacity of up to 2.5 tons, it is suitable for moving materials, equipment, and goods in warehouses, factories, airports, and other environments.

Overview

Industrial Electric Towing Solution

The TB25N electric tow tractor utilizes high-efficiency lithium battery technology to provide a clean and powerful solution for airports, seaports, railway stations, and large-scale warehouses. Engineered with an integral rigid frame, this tractor balances exceptional stability with high-torque performance. Its advanced shock absorption and ergonomic design ensure driver comfort during intensive material handling tasks.

Performance

Towing Capacity

2.5 tons

Max Towing Capacity

Power Source

Lithium Battery, Electric Drive, Zero Emissions

Technical Features

Safety Systems

- High-performance vehicle braking system
- Regenerative braking
- Integral rigid frame for stability
- Comprehensive safety monitoring

Driver Comfort

- Damping shock absorption system
- Adjustable operator seat
- Low noise operation

Certifications & Applications

Suitable Environments

Airports • Seaports • Railway Stations • Warehouses
