

Electric Tricycle with Passenger Seat

This electric tricycle is designed for personal transportation and light cargo carrying. It features a front basket for storage and a rear passenger seat with safety rails.

Overview

Versatile Electric Tricycle

This electric tricycle is engineered for efficient personal transportation and light-duty cargo carrying. Featuring a convenient step-through frame design, it ensures easy access for riders of all abilities. The vehicle is equipped with a dedicated rear passenger seat complete with a backrest and safety rails, making it an ideal solution for short-distance transport needs.
