Product Overview

High-Efficiency Electric Trolley

This electric trolley is engineered for reliable material handling, featuring a robust 100% copper wire motor and high-grade silicon steel construction for improved efficiency and longevity. It incorporates advanced safety features, including an overheat protector and a high-performance braking system, ensuring secure operation under load. Built for industrial environments, the unit is rated to IP54 and complies with EU standard EN-14492-2, making it a dependable solution for various lifting applications.

Technical Specifications

Rated Voltage	230V-50Hz
Input Power	200 W
Loading Capacity	1000 kg
Moving Speed	16 m/min
Assembling Height	3 m

Operational Features

Material Highlights

- 100% Copper wire motor
- High grade silicon steel
- Galvanized aircraft wire rope
- Reinforced flame retardant nylon parts

Performance Metrics

54 IP

IP Rating

14492 EN-14492-2

EU Standard Compliance

Safety Features

Overheat Protection, High-Performance Braking, Forward/Backward Limit, Anti-Twist Wire Rope
