

Electric ULV Cold Fogger Sprayer

This electric ULV (Ultra Low Volume) sprayer is designed for efficient application of liquids. It utilizes an electric motor to generate a fine mist, allowing for even coverage and minimal waste.

Overview

Professional Electric ULV Cold Fogger

This electric Ultra Low Volume (ULV) cold fogger is engineered for high-efficiency liquid application, making it an essential tool for disinfection, sanitizing, and pest control tasks. Its powerful motor produces a fine, consistent mist with particle sizes ranging from 15-50µm, ensuring thorough coverage while minimizing chemical waste. Designed for ease of use and portability, this sprayer is an effective solution for maintaining hygiene and controlling environments in various professional settings.

Technical Specifications

Spray Volume

5 L/h Min Discharge	25 L/h Max Discharge
-------------------------------	--------------------------------

Tank Capacity 4 L

Particle Size 15-50µm

Power & Electrical

Power Requirements 220V, 50Hz

Physical Dimensions

Net Weight 4 kg

Product Dimensions 35.5 x 27 x 47.5 cm

Model Information

Model Number
3WCD-4
