Overview

Efficient Electric Utility Towing

This electric utility tow vehicle is engineered for light-duty towing and hauling in confined industrial environments such as warehouses, factories, and airports. Featuring a compact design with a tight turning radius, it ensures high maneuverability while maintaining a durable, emission-free operation. The vehicle includes essential safety features like headlights, taillights, and regenerative braking to support efficient and eco-friendly daily operations.

Performance

Power Source	Electric Motor
Braking System	Regenerative Braking

Design & Features

Safety Equipment

- Headlights
- Taillights
- Horn

Operator Environment

- Comfortable operator seat
- Clear windshield
- Diamond-patterned metal floor
- Ergonomic steering wheel

Key Features	Compact Design, Tight Turning Radius, Adjustable Towing Hitch, Emission-free
--------------	--

Applications

Suitable Environments

Warehouses • Factories • Airports • Industrial Sites
