Product Overview

Efficient Utility Transport

This electric utility tricycle offers a stable and eco-friendly solution for urban transport and light cargo needs. Featuring a robust frame and a rear storage compartment, it balances functionality with modern design. Its electric powertrain ensures quiet, emission-free operation, making it an ideal choice for environmentally conscious logistics.

Performance

Maximum Speed

45 km/h
Max Speed

Motor Power	800 W
-------------	-------

Battery & Power

Battery Voltage Options	60V, 72V
-------------------------	----------

Battery Capacity	30 Ah
------------------	-------

Capacity & Dimensions

Loading Capacity	150 kg
------------------	--------

Tire Specifications	3.00-12
---------------------	---------

Features

Vehicle Highlights

- Rear storage compartment
- Enhanced stability design
- Integrated front and rear lighting
- Side mirrors included
- Quiet electric powertrain
