

Electric Utility Vehicle with Flatbed

This electric utility vehicle features a flatbed for efficient goods transport. Its compact design and electric motor allow for quiet, emission-free operation in various industrial settings.

Overview

Versatile Electric Utility Solution

The GLT3022 is an electric utility vehicle designed for efficient material transport across various industrial settings. Featuring a robust flatbed, comfortable seating, and a compact design, it ensures high maneuverability in tight spaces like warehouses and factories. Its electric motor provides a quiet, emission-free operation, making it an ideal choice for indoor and outdoor industrial environments.

Performance & Power

Environmental Impact

Emission-free • Quiet Operation
