Product Overview

Versatile Material Handling

This electric vacuum lifter is specifically designed for handling heavy plates including steel, glass, granite, and marble. Featuring automatic pressure control, it ensures safety by preventing system failure during transport and installation. The unit is engineered for mobility and precision, offering electric lifting, tilting, and side-shifting capabilities for complex industrial workflows.

Technical Specifications

Performance Metrics

1.5 M

Electric Lift Height

100 mm

Electric Side Shift

Operational Features

- Self-propelled drive system
- Electric lift mechanism
- Electric tilting (vertical to horizontal and reverse)
- Electric side shift (left & right)
- Manual rotation

Suitable Materials

Steel, Glass, Granite, Marble

Safety & Control

Safety Systems

Automatic Pressure Control • Fail-safe Vacuum Routing • Emergency Stop
