

# Electric Valvetronic Exhaust System

This electric valvetronic exhaust system is designed for performance enhancement. It features electronically controlled valves for adjustable exhaust sound and flow.

## ADDITIONAL IMAGES

## Product Overview

### Performance Valvetronic Exhaust System

This Electric Valvetronic Exhaust System is engineered to provide a dynamic balance between performance enhancement and acoustic control. Featuring electronically controlled valves, the system allows drivers to adjust exhaust sound levels and flow characteristics on demand. Constructed from high-quality materials, it ensures durability while optimizing exhaust backpressure for improved vehicle performance.

## Technical Specifications

### Key Performance Benefits

- Adjustable exhaust sound levels
- Improved exhaust gas flow
- Enhanced vehicle performance

### Valve Control Mechanism

Electric Valvetronic

## Compatibility

### Compatible Vehicle Applications

Make	Model Year	Engine/Variant
Honda	2016	Jade 1.8NA/1.5T
Audi	2019	A4 2.0T
BMW	2019	B58 740Li 3.0T

### System Category

Performance Exhaust • Aftermarket Upgrade • Valvetronic
