

Electric Wafer Cone Machine

This electric wafer cone machine produces high-quality wafer cones. It features stainless steel construction and a precise heating system for even baking.

Product Overview

Professional Wafer Cone Production

This electric wafer cone machine is designed for efficient, high-quality production of crisp ice cream cones. Constructed with 304 stainless steel for food safety and durability, it is an ideal solution for small to medium-sized ice cream factories and bakeries. The system features adjustable temperature controls and a rapid 1-2 minute baking cycle, ensuring consistent results with minimal operational footprint.

Technical Specifications

Baking Cycle

1 min Min	2 min Max
---------------------	---------------------

Key Characteristics

- Integrated forming and baking
- Interchangeable mold designs
- High-temperature resistant materials
- Adjustable upper and lower mold temperatures
- Compact, space-saving design

Material	304 Stainless Steel
-----------------	---------------------

Operational Guidelines

Workflow

Step	Action
1	Place machine on a flat, stable surface
2	Connect power and preheat upper/lower molds
3	Pour slurry and close molds
4	Bake for 1-2 minutes
5	Open molds to release cone automatically

Maintenance	Unplug when not in use, Clean molds regularly, Keep surface level
