

Electric Wall Sander with Dust Extraction

This power tool is designed for efficient sanding of walls and ceilings. It features a rotating sanding head with variable speed settings for smooth material removal and is equipped with a dust extraction system.

Product Overview

Professional Surface Preparation

This electric wall sander is an efficient power tool designed specifically for smoothing walls and ceilings. Featuring a powerful 1200W motor and a variable rotation speed, it provides consistent material removal for various finishing tasks. The lightweight design and ergonomic handle support comfortable operation, while the integrated dust extraction system ensures a cleaner working environment.
