Product Overview

KSD301C C-200 Series Overview

The KSD301C series is an advanced thermostat specifically engineered to manage the high electrical capacity demands of professional electric water heating systems. Utilizing a bimetallic snap-action disc, this component delivers precise temperature regulation and reliable contact separation for extended operational life. With its robust construction, it provides both efficient performance and critical overheat protection for domestic and commercial applications.

Technical Specifications

Available Temperature Settings

- 32°C (90°F)
- 52°C (125°F)
- 66°C (150°F)
- 85°C (185°F)

Key Features

- Surface mount design
- Bimetallic snap-action disc
- Manual reset mechanism
- High electrical load capacity

Series Variants

C-200, C-203, C-208R

Certifications

Standard Approvals

UL • CUL • TUV • CQC • CE
