

Electric Water Heater with ABS Body

This electric water heater features a high-impact resistant ABS body. The quadro-layer enameled SPCC tank ensures a longer product life.

ADDITIONAL IMAGES

Overview

High-Efficiency Electric Water Heater

This electric water heater features a high-impact resistant ABS body and a specialized Quadro-layer enameled SPCC tank for extended product life. Designed for versatility, it supports both under-sink and above-sink installations with multiple color options for the outer shell. With a 5-star BEE energy rating and advanced insulation materials, it provides superior energy saving and environmental protection for residential applications.

Key Performance Metrics

Performance Highlights

0.8 MPa

Rated Pressure

75

Max Temperature

5 Star

BEE Energy Star

Technical Specifications

Power Options

- 500W
- 1000W
- 1500W
- 2000W
- 2500W

Water Proof Degree

IPX4

Rated Voltage

220-240V~, 110-120V~

Rated Frequency

50Hz, 60Hz

Construction & Design

Core Features

- Under or above sink available
- H/R Light available
- New generation insulation material
- Multiple color options for outer shell
- Anti-scale and self-cleaning design

Body Material

High impact resistant ABS

Tank Construction

Quadro-layer enameled SPCC tank

Tank Engineering

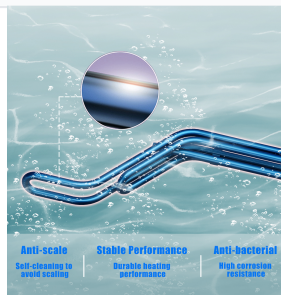

The exclusive single weld line design uses thickened SPCC material to reduce leakage risk by 67% compared to standard tanks.

Weld Technology

Feature	Benefit
Single Weld Line	Reduces leakage risk by over 67%
Weld Jointing	Reduced by 1/2 compared to triple weld designs
Weld Length	Reduced by 1/4 for better pressure resistance
Material	Customized thickened SPCC for high-rise use

Heating Element

High-performance heating element featuring anti-scale and anti-bacterial properties for long-lasting efficiency.

Heating Element Performance

Anti-scale, Anti-bacterial, Corrosion Resistant, Durable Performance
