

Electric Water Transfer Pump

This high-performance water pump is designed for efficient water transfer and pressure boosting. Constructed with a durable stainless steel pump housing and a powerful electric motor, this pump is suitable for various applications, including irrigation, domestic water supply, and industrial processes.

Overview

High-Performance Water Transfer Solution

This electric water transfer pump is engineered for superior efficiency in both water transfer and pressure boosting applications. Featuring a robust stainless steel housing and a high-power electric motor, it provides reliable, consistent performance for industrial, agricultural, and residential use. Its compact, durable design ensures easy installation while minimizing maintenance requirements for long-term cost-effectiveness.

Technical Specifications

Design Advantages

- Compact footprint
- Durable construction
- Low maintenance requirements
- Consistent flow and pressure

Housing Material	Stainless Steel
Power Type	Electric

Application Suitability

Primary Applications	Irrigation, Domestic Water Supply, Industrial Processes, Pressure Boosting
----------------------	--
