Product Overview

Professional Electric Wet Sander Polisher

This specialized electric wet sander and polisher is designed for high-efficiency wet processing applications. Featuring a robust 900W motor and a versatile speed range of 500-4500 RPM, it is engineered for precision work on stone, concrete, and automotive surfaces. The integrated water feed system helps minimize dust, reduce heat buildup, and extend the lifespan of your abrasive materials.

Technical Specifications

Power Output	900 W
Speed Range	500-4500 RPM
Voltage Compatibility	110V, 230V
Frequency	50/60 Hz
IP Rating	IP20

Features

Water Feed System

- Bottom water hose connection
- Upper water hose connection
- Integrated water control valve

Certifications

CE Certified
