

Electric Winch for Construction

This heavy-duty electric winch is designed for construction and industrial applications. It features a robust gearbox, a high-torque electric motor, and a durable wire rope spool.

Overview

Heavy-Duty Construction Winch

This industrial-grade electric winch is engineered for demanding construction and lifting applications. It features a robust gearbox and a high-torque electric motor for reliable performance under heavy loads. Built on a sturdy steel frame, it ensures stability and straightforward installation for professional job sites.

Technical Specifications

Intended Use

- Construction lifting
- Industrial pulling
- Heavy load handling

Drive System	Electric
Key Components	Robust Gearbox, High-Torque Motor, Durable Wire Rope Spool, Steel Frame
