Product Overview

High-Performance Electric Wire Rope Hoist

This electric wire rope hoist is engineered for demanding lifting applications in construction sites, workshops, and warehouses. It features a robust motor and high-strength wire rope, ensuring reliable performance and durability under load. Designed with safety in mind, it includes an emergency stop function and overload protection, offering a secure solution for heavy-duty material handling.

Technical Specifications

Lifting Capacity

400 kg

Capacity (Double Line)

800 kg

Capacity (Single Line)

Electrical Requirements

Parameter	Value
Voltage	220V-230V
Frequency	50Hz
Input Power	650W

Lifting Height

- 8m (at 400kg)
- 16m (at 200kg)

Safety & Features

Safety Mechanisms	Emergency Stop, Overload Protection
Operation	Remote control operation

Application

Recommended Use

Construction • Workshops • Warehouses • Garages
