

Electric Wire Rope Hoist with 2000kg Capacity

This electric wire rope hoist is a heavy-duty lifting device designed for industrial applications. It has a 2000kg capacity and features a robust motor, a durable wire rope, and a reliable hook for secure lifting.

Product Overview

Industrial Lifting Performance

This heavy-duty electric wire rope hoist is engineered for demanding industrial applications requiring reliable and precise material handling. Featuring a robust motor and durable wire rope construction, it ensures consistent performance and safety during operation. Its compact design allows for efficient installation in confined spaces, making it a versatile solution for various warehouse and factory environments.
