

Electric Wood Planer

This electric planer is designed for woodworking, providing adjustable depth settings. It features a robust motor for efficient material removal and a precision-machined base for smooth, accurate planing.

Overview

Professional Woodworking Performance

This electric power planer is engineered for precision material removal and surface smoothing in woodworking applications. Featuring a robust 850W motor, the tool delivers consistent power to handle various wood types efficiently. Its ergonomic design and adjustable depth settings ensure that professional users can achieve high-quality results with comfort and control.

Technical Specifications

Rated Power	850 W
