

Electric Wood Router

The electric router is a versatile power tool used for shaping wood, plastic, and other materials. It features a high-speed motor that drives a rotating cutter bit, allowing for precise and intricate cuts.

Overview

Professional Electric Wood Router

This high-performance electric wood router is designed for precision woodworking, edge profiling, and intricate joinery. Equipped with a powerful 1200W motor, it offers adjustable speed settings ranging from 10,000 to 28,000 RPM to handle various materials including wood and plastic. Its compact and ergonomic design ensures accuracy and consistency for demanding professional applications.

Technical Specifications

Input Power

1200 W
Input Power

No Load Speed	10000-28000/min
Collet Capacity	8 mm

Electrical Requirements

Rated Voltage	230V-240V
Frequency	50 HZ

Logistics

Net Weight	3.6 KGS
Packing Size	29.5 x 14.5 x 25.5 cm
