

Electric Yogurt Maker with Six Cups

This yogurt maker is designed for home use, allowing users to easily create fresh, homemade yogurt. It features a transparent lid for monitoring the yogurt-making process and maintains a consistent temperature for optimal bacterial growth.

Product Overview

Fresh Homemade Yogurt Simplified

This electric yogurt maker is designed to help you create healthy, creamy, and delicious homemade yogurt with ease. Featuring a 1500ml total capacity across six individual cups, it is perfect for controlled portions and convenient storage. The device utilizes advanced PTC heating technology to maintain a constant temperature, ensuring the activation of lactobacillus and optimal bacterial growth for high-quality results.

Technical Specifications

Power Consumption	20 W
Voltage & Frequency	220V-240V, 50Hz
Total Capacity	1500 ml

Design & Features

Visibility & Convenience

- Transparent top cover
- Container lid included
- Observable process

Included Yogurt Cups	6
Heating Technology	PTC Constant Temperature, Equal Heat Transmission
