

# Electrical Cable Joint

This cable joint is designed for establishing electrical connections. It features a durable construction, including a black insulating body and a brass connector, and is available in multiple sizes to fit cable diameters from 10-95mm.

## Overview

### High-Performance Electrical Cable Joints

These electrical cable joints are engineered for reliable connections in demanding machinery and industrial applications. Featuring a robust black insulating body and a high-conductivity brass connector, they ensure secure power transmission across various environments. Designed for versatility, the series accommodates a wide range of cable diameters to meet diverse technical requirements.

## Key Features

### Key Highlights

**95 mm<sup>2</sup>**

Max Cable Size

**10 mm<sup>2</sup>**

Min Cable Size

## Technical Specifications

### Available Size Ranges

Model Reference	Cable Diameter Range
CJ04	10-25mm <sup>2</sup>
CJ04	35-50mm <sup>2</sup>
CJ04	50-70mm <sup>2</sup>
CJ04	70-95mm <sup>2</sup>

## Material & Construction

Connector Material	Brass
Insulation Material	Robust black insulating polymer

## Application

### Recommended Use

- Industrial machinery
- Electrical power connections
- Heavy-duty equipment wiring

### Suitability

Industrial Grade • Heavy Duty
